

ZINC DIE CAST ALLOY & ACETAL ACCESS PANEL LATCHES

- With screwdriver opening port
- Featuring highly reliable, economical construction

This low cost alternative to multi-component Access Panel Latches is made possible by simplifying their design.

Dynacast IP's Four-Slide Technology makes it all possible: die cast housing has integral rivet lugs for volume assembly or option of thru hole for pop rivets, etc.; acetal pawl is injection molded. Acetals of high lubricity and excellent memory, work together to provide smooth, positive locking action while tolerating inadvertent misalignment and shock loads; attractive stippled finish housing will not rust - can be provided with special plated finishes, special mounting features such as bosses, square studs, etc. And logos where volume and scheduling permits.

Dynacast Stock Number	Type	Dimensions
511812	Rivet Lug	1/8 Dia. x. 120L With riveting recess
511814	Thru Hole	.093 Thru Hole

Panel Latches are available • as tabled • custom and special shapes to your print.
